Our Sweetgrass Warehouse expands its capabilities with the RV Industry in mind!

For more than 30 years, Cole International has provided the best transborder service for your small packages: ColePac – a value-added service we created to give our clients a highly reliable and cost-effective option for shipping small packages across the Canada-US border. With the opening of our newly constructed office and warehouse facility in Sweetgrass, Montana, we are now ready to take our ColePac small parcel service to the next level.

While the ColePac of old was limited to packages under 70 lbs (32 kg), ColeCargo will now accept all RV parts and accessories – regardless of size.

With 3,000 sq ft of new space, our warehouse is fully racked with two dock-level doors plus a drive-in door that allows us to easily transload almost anything for transport directly to your door.

Bigger service and bigger savings to help you keep your competitive edge

Many RV OEMs (Original Equipment Manufacturers), as well as smaller specialty vendors offer “ship free in the USA” programs. Those that do not tend to offer heavily discounted US domestic rates with various carriers.

To help level the playing field for our clients receiving goods from US vendors to Canadian destinations, Cole International has a program that can reduce your overall transportation costs for larger purchases by as much as 30%. Here’s how it works:

1. Have your US vendors arrange for their free shipping or discounted domestic shipping to our Sweetgrass facility.

Ship your large purchases to:
(Your Company Name)
c/o ColeCargo
115 Central Avenue
Sweetgrass, MT, USA
59484

2. From there, Cole International will:

- Co-ordinate the necessary paperwork and clear your goods through Canada Customs
- Arrange transportation of your goods to your location anywhere in Canada with second-day service available to Alberta and Saskatchewan.
