

U.S. Freight & Warehousing

coleintl.com

Specialized services for our oil & gas clients

To serve the unique and time-sensitive demands of the oil & gas industry, Cole International USA's Houston branch has an attached warehouse facility with on-site export crating capabilities.

No matter the size or type of shipment, we'll crate, pack and prepare your oilfield equipment for safe, secure and fully protected transport by air, ocean or ground. Your shipments will arrive on time – and intact – when you rely on Cole International's export crating and freight forwarding services.

Our oilfield equipment packing and crating services include containerization, boxing and skidding, pallet shrink-wrapping, hazardous material (HazMat) services, pipe crates and skids, container LBB (load, block, brace), offsite project packing, and domestic or international consolidation and distribution.

Global reach with a local touch

Faced with the challenges of navigating the ever-changing global marketplace, businesses today require a skilled and experienced logistics partner to keep their goods on the move.

Cole International will secure the logistics solutions best suited to the needs of your business. Our experience in all modes of international and domestic transport allows us to deliver reliable, efficient, secure solutions. Is it any wonder so many businesses make Cole International their freight-forwarding partner?

Our global freight-forwarding capacity

To provide reliable freight-forwarding solutions on a global scale, Cole International USA is a partner in the World Cargo Alliance (WCA) – an established network of independent freight forwarders with member offices in 188 countries. The global representation that comes with WCA membership allows Cole International to provide complete, fully customized freight-forwarding services.

For more information, please contact our Houston branch at 281-999-3737 or HoustonFreight@coleintl.com
